BUNTINGS' NURSERIES, INC.

Selbyville, Delaware

C. A. BUNTING

Personal Message

WITH pleasure we present our 1933 catalog, featuring the products of many fertile acres of soil planted to trees and plants that thrive in this climate. The thought foremost in the minds of those responsible for the existance of this organization is quality and service. Realizing during the past few years that the price schedule of the products we grow would have to conform with general economic conditions, we started early to make proper adjustments in our organization whereby the same high grade of stock could be produced and sold to the public at a much lower price and at the same time allow us to remain in business.

Many nurseries have been forced to cut down on operating expenses to the extent that fertilizer and cultivation has been eliminated. It will be worth your while to be cautious when placing orders for trees and plants because stock produced under those conditions will invariably prove disappointing. Our complete acreage has received the usual care in nursing, cultivation and the necessary applications of plant food. We are in a position to ship the same high grade of trees and plants that we have delivered in the past, at greatly reduced prices.

We do appreciate your business and with pleasure extend to you all an invitation to visit our Nurseries.

A stylized, handwritten signature in black ink, likely belonging to C. A. Bunting. The signature is written in a cursive, somewhat abstract style with many loops and flourishes.

President,

BUNTINGS' NURSERIES, INC.

MAGNOLIA SOULANGEANA—See Page 13

INSTRUCTIONS TO PURCHASERS

ORDERS. Orders should be sent in just as soon as possible after receiving catalog. By placing orders early you are more certain of getting the varieties wanted, as late in the season we are usually sold out of some of the varieties. If ordered early we can reserve the stock until you want it shipped. We acknowledge receipt of all orders promptly.

SHIPPING SEASON. We begin filling orders about September 1st and continue digging and shipping during the entire fall, winter and spring until June 1st. We are sometimes delayed in January, February and the early part of March by freezing weather, but usually able to ship most of the time during these months.

THE PROPER PLANTING SEASON is during the months of February, March and April in the spring, and late October, November and December in autumn. Nursery stock is successfully planted any time during winter months that ground is not hard frozen. In freezing weather the roots should be well protected when handling and not exposed to frost.

APPLICATION OF PRICES. The prices in this catalog (except where otherwise noted) apply as follows: 1 to 4 trees or plants of ONE KIND are sold at the each rate; 5 to 30 of ONE KIND are sold at the 10 rate; 30 to 250 of ONE KIND are sold at the 100 rate; 250 or of ONE KIND at the 1000 rate.

TERMS. Cash with order; but orders will be booked if one-fourth value is received with order, remainder to be sent before time of shipment. We allow a cash discount of 5 per cent on all orders, large or small, when cash accompanies orders in full. Remit by money order, registered letter, check or draft.

PACKING. We make no extra charge for boxing and packing. All stock is delivered within a radius of 500 miles of Selbyville, unless otherwise noted, at the prices quoted in this catalog. We use damp moss in packing all stock, which insures safe delivery.

WHEN YOU RECEIVE TWO CATALOGUES, please hand one to your neighbor.

WARRANTY. We strive to avoid mistakes and believe we are exact as any in the business. Any stock received from us that is not true to name, we agree to replace on proper proof, such stock free of charge, or refund purchase price. It is understood and agreed between the buyer and ourselves that we will not be held responsible for any greater sum than the cost of the stock, should any prove untrue.

REFERENCE. We refer you to Dun's and Bradstreet's commercial agencies, and Baltimore Trust Company of Selbyville, Del.

TELEGRAPH OR TELEPHONE US AT SELBYVILLE, DEL.

WE CANNOT GUARANTEE STOCK TO LIVE. We guarantee all stock we sell to be strictly first class and True-to-Name, dug and packed properly for shipment. Our prices compete with other reliable nurserymen, we do not charge a price for a tree, that should it die we could replace it and then still make a profit. Stock often perishes when it is not properly planted and cultivated; also the severe cold and heavy storms of winter and droughts of spring and summer, which are liable to occur, will sometimes cause the best of stock to perish, which is no fault of ours.

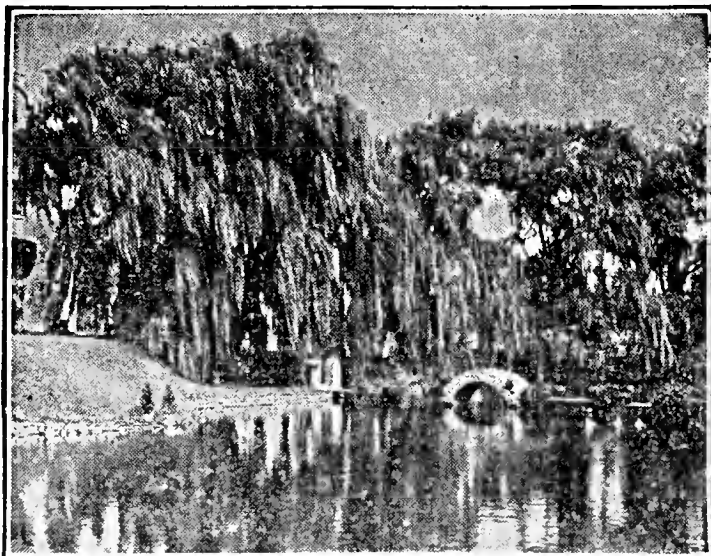

It is impossible for us to guarantee trees and plants to live, as this altogether depends on weather conditions and how stock is planted and cared for after planting. The conditions which prevail after stock leaves our hands are such that it is just as impractical for a Nurseryman to guarantee a tree or plant to live as it would be for your best neighbor to sell you a horse or other live stock and guarantee it to live. We can only guarantee to send you good stock up to the grade represented, full of life and true to name.

SHIPMENTS. After we deliver stock to the forwarding companies and receive their receipt for the shipment in good condition, our responsibility ends. If stock is damaged while in transit, have agent at point of delivery to note such damages on freight or express bill, and present your claim for damage with said agent against forwarding companies. Keep copies of all papers. If adjustment is not made within a reasonable time take the matter up with us; we will endeavor to help you get a prompt adjustment.

SUBSTITUTION. When sold out of a variety of trees or plants, we frankly say so, and when you allow us to substitute we will send a variety similar to the one ordered, as good or better; as we know the many varieties our substitution, if any, will be of advantage. Late in the season we are sometimes sold out of some varieties of stock, thus when sending your order it is to your advantage to say whether we may substitute or not, that we may get order off promptly, before the season is too far advanced for successful planting. If you do not wish us to exercise this right, please mark your order sheet plainly "NO SUBSTITUTION."

CLAIMS. If any, must be made within five days from receipt of stock. We cannot become responsible for damage to stock caused by droughts, floods, frosts, insects, fire, etc., and by stock not being taken from express office for several days after its arrival.

NOTICE OF SHIPMENT. Notice will be sent you when your order has been shipped.

For a beautiful weeping tree in low springy ground nothing beats the Weeping Willow. They are good for dry situations also.

Home-Ground Beautification

EACH year it becomes more necessary that the home and its surrounding grounds be tastefully planted. Without the added beauty of foliage and flower, and the comfortable shade of a tree or two even the most attractively built home appears cold and uninviting. Besides the need for proper ornamental planting about the house, the public portions of the yard and the intimate flower garden; the home ground is not complete without a few fruit trees and a space for growing Strawberries, Rhubarb and Asparagus in connection with the vegetable garden. In fact all of these things when properly located make up the completed picture of a livable American property. Besides the beauty and usefulness of trees and plants the property when carefully planted is greatly increased in value. Today, more than ever before, it is possible to obtain this necessary beauty and additional property value at the lowest possible cost. Now is the time to go ahead with your planting.

THE PLANTING PLAN

The planting you intend doing whether it be of pretentious or modest nature deserves careful, studied, beforehand planning. A planting plan will guard against disappointment in ultimate effect as well as give you a clear idea of the appearance and nature of the planting before it is planted. A planting plan makes possible a saving by helping you to decide just what plants are needed before you place your order. Only the kinds and number you want and will need are purchased.

BUNTINGS' LANDSCAPE SERVICE

Trained landscape designers will give your planting problems the careful, individual attention they should have. We are equipped to handle planning and planting work, large and small, both public and private. The effect you desire is clearly worked out on the plan, plants required are listed and an estimate of the cost given. Every effort is made to give you a plan best adapted to your own conditions and desires. Come and see us about a plan for your planting, or write to us about your planting problems. Upon receiving your inquiry we will send our service representative to see you, or in case of great distance from Selbyville, we will answer your questions and give further instructions by mail. When furnished with the necessary information the plan and estimate can be completed and mailed to you. Write and ask us for further information about this planning service.

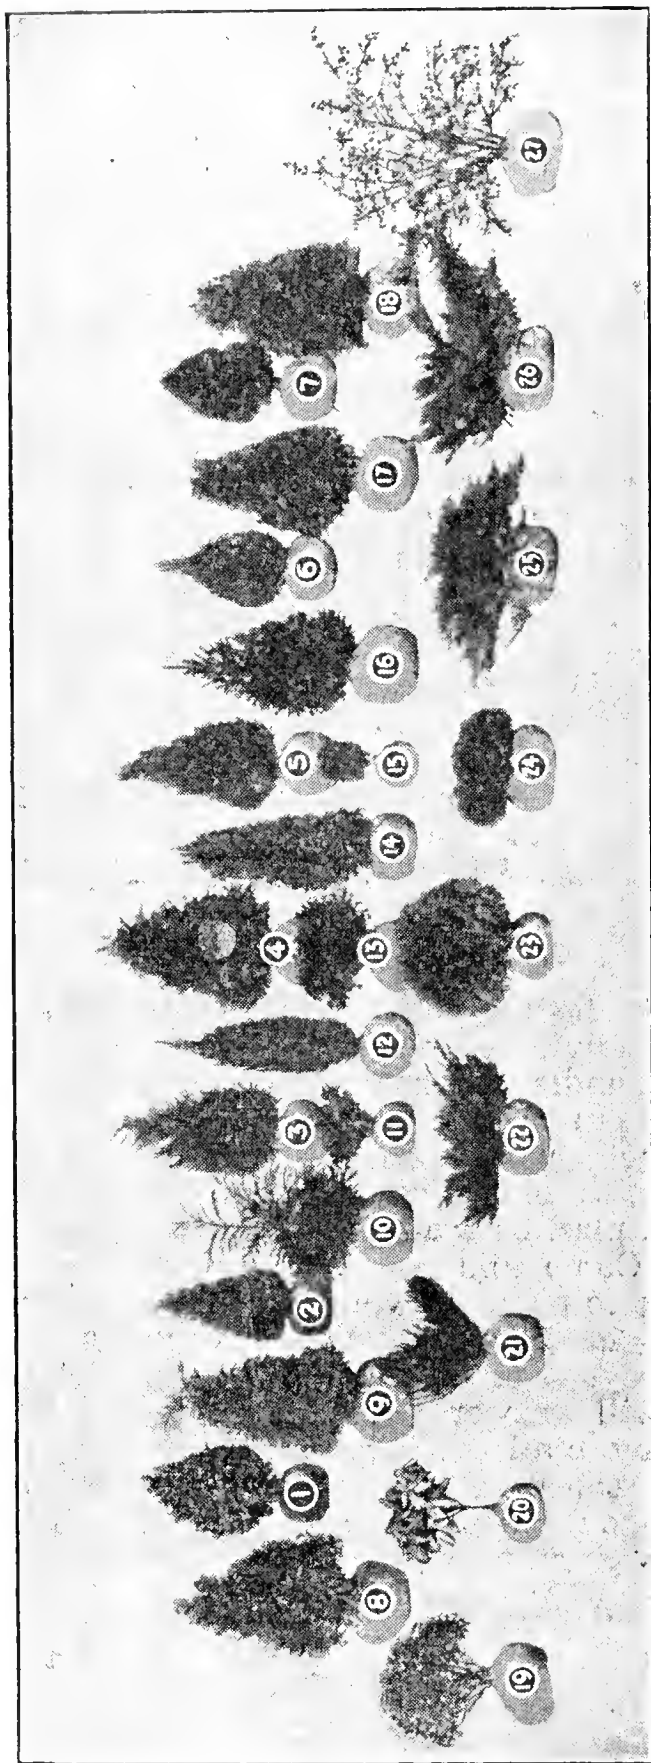

EARLY ACTION IS IMPORTANT

We urge you to get in touch with us immediately about your plans for spring planting. The making of a planting plan requires careful consideration and time. It will be to your advantage to have all details of your planting plan settled while we have ample time to work on it and before planting season begins. Let us get to work on your plans at once so that you can take advantage of the benefits of early planting.

THIS IS THE YEAR TO PLANT THE HOME GROUNDS —PLAN TO PLANT NOW

Prices on all nursery stock, both ornamental and general, are the lowest they have ever been. The quality of Buntings' trees, shrubs and plants remain at the same high standard they have always maintained. We offer complete landscape service, free of charge, to our customers.

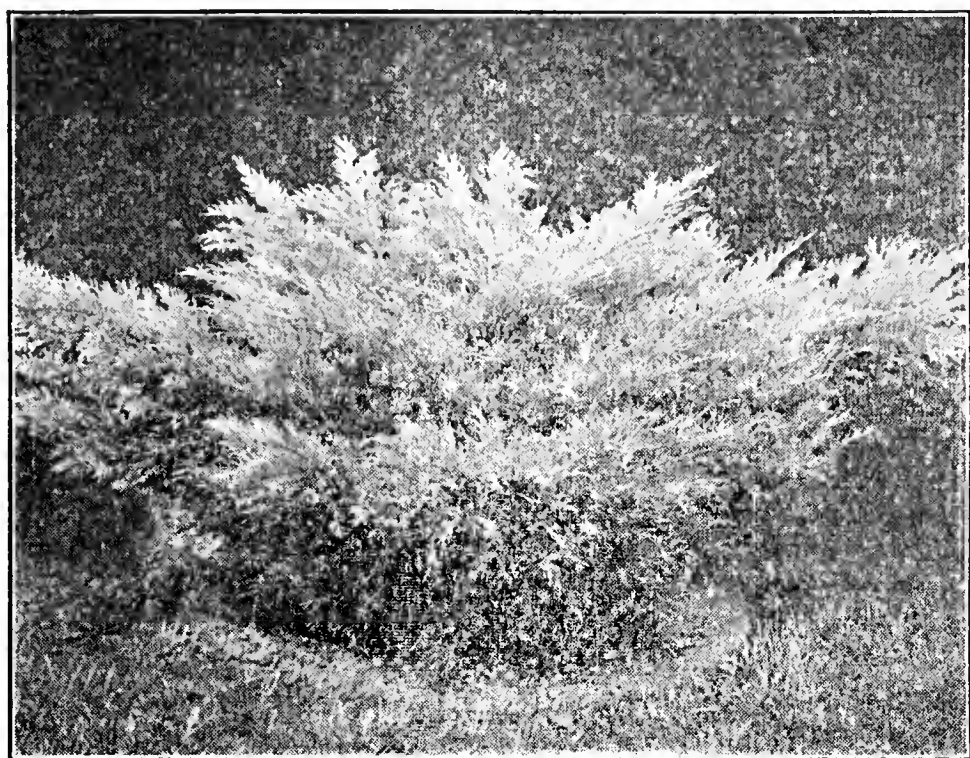

Evergreens have a year around usefulness and beauty possessed by no other class of plants. Their variety and form, texture and color make a satisfying and complete picture during the winter months. In summer they serve the additional purpose of background and setting for other growing things.

This photograph has been specially prepared by us for the convenience of our customers in selecting their Evergreens. The following is a key to each variety as per number listed on ball of each tree: (1) *Euonymus Japonica*. (2) *Juniper Stricta*. (3) *Juniper Virginiana*. (4) *Retinospora Plumosa*. (5) *Retinospora Plumosa Aurea*. (6) *White Leaf Chinese Juniper*. (7) *Golden Arborvitae*. (8) *George Peabody Arborvitae*. (9) *Retinospora Squarrosa Veitchii*. (10) *Hemlock Spruce*. (11) *Daphne Cneorum*. (12) *Irish Juniper*. (13) *Azalea Hinodegiri*. (14) *Pyramidal Arborvitae*. (15) *Boxwood Suffruticosa*. (16) *Norway Spruce*. (17) *American Arborvitae*. (18) *Retinospora Sulphurea*. (19) *Globe Privet*. (20) *Rhododendron*. (21) *Savin Juniper*. (22) *Juniper Depressa Plumosa*. (23) *Globe Arborvitae*. (24) *Dwarf Mountain Pine*. (25) *Tamarix Juniper*. (26) *Juniper Pfitzeriana*. (27) *Abelia Grandiflora*. Note habit of growth of each variety which is the idea of the illustration.

If you plan new landscaping work or alterations of present plantings, ask our representative to call. His training will help you in arriving at a satisfactory solution of your problems.

Prices on all nursery stock, both ornamental and general, are the lowest they have ever been. The quality of Buntings' trees, shrubs and plants remain at the same high standard they have always maintained. We offer complete landscape service, free of charge, to our customers.

THE BEAUTIFUL PFITZER'S JUNIPER

Evergreens

All Evergreens are compact, nicely shaped specimen plants, balled and burlapped for shipment.

We pay transportation charges on all Evergreen orders received within a radius of 500 miles of Selbyville, if the order amounts to \$10.00 or more.

ARBORVITAE

AMERICAN ARBORVITAE (*Thuja Occidentalis*). Foliage flat set on edge, color bright green. One of the most extensively planted Arbovitaes.

	Each	10		Each	10
1 to 1½ ft.	\$0.50	\$4.00	3 to 4 ft.	\$2.00	\$17.50
1½ to 2 ft.75	7.00	4 to 5 ft.	3.25	30.00
2 to 3 ft.	1.25	10.00			

BAKER'S PYRAMIDAL ARBOVITAE (*Orientalis Bakeri*). Fine, tall, columnar type with soft, light green foliage.

18 to 24 in.	\$0.80	\$7.00	3 to 3½ ft.	\$1.75	\$15.00
2 to 3 ft.	1.25	10.00			

BIOTA BONITA (*Orientalis Bonita*). 2½ to 4 ft. A broad, cone shaped, very slow growing variety. Green foliage.

12 to 15 in.	\$1.25	\$10.00	18 to 22 in.	\$2.00	\$17.50
15 to 18 in.	1.50	12.50			

CHINESE ARBOVITAE (*Biota Orentalis*). Tall, slender, fast grower, dark green foliage.

1 to 1½ ft.	\$0.40	\$3.00	2 to 3 ft.	\$1.00	\$7.50
1½ to 2 ft.60	5.00	3 to 4 ft.	1.30	12.00

GEORGE PEABODY ARBOVITAE (*Thuja Occidentalis Lutea*). Foliage clear, lasting golden yellow. Broad pyramidal type.

18 to 24 in.	\$1.50	\$12.50	2½ to 3 ft.	\$2.25	\$20.00
2 to 2½ ft.	1.75	15.00			

GLOBE ARBOVITAE. (*Thuja Globosa*). Very dark in growth, round or globe shaped, foliage dark green. Does not require shearing.

8 in. diameter	\$0.60	\$4.00	18 in. diameter	\$1.25	\$10.00
12 in. diameter75	6.00	21 in. diameter	1.50	12.50
15 in. diameter	1.00	8.00	24 in. diameter	2.00	17.50

GOLDEN ARBOVITAE. (*Biota Aurea Nana*). Conical form, very dense and compact, bright yellow foliage.

6 to 8 in.	\$0.70	\$6.00	15 to 18 in.	\$1.75	\$15.00
8 to 10 in.80	7.00	18 to 22 in.	2.25	20.00
10 to 12 in.	1.25	10.00	22 to 26 in.	2.75	25.00
12 to 15 in.	1.40	12.50			

GOLD TIP ARBOVITAE (*Thuja Occidentalis Elegantissima*). Rich lustrous green with yellow tipped branches.

12 to 18 in.	\$0.70	\$6.00	2½ to 3 ft.	\$2.00	\$17.50
1½ to 2 ft.	1.00	8.00	3 to 4 ft.	2.75	25.00
2 to 2½ ft.	1.25	10.00			

PYRAMIDAL ARBOVITAE (*Thuja Pyramidalis*). Tall, slender, dense, dark green foliage. The best Arbovitae grown.

	Each	10		Each	10
8 to 12 in.	\$0.50	\$4.00	3 to 4 ft.	\$2.50	\$22.50
1 to 1½ ft.80	7.00	4 to 5 ft.	3.50	32.50
1½ to 2 ft.	1.00	8.00	5 to 6 ft.	5.00	47.50
2 to 3 ft.	1.75	15.00			

SIBERIAN ARBOVITAE (*Thuja Occidentalis Wareana*). Gray green foliage, slow compact growth of broad pyramidal shape.

15 to 18 in.	\$1.50	\$12.50	2 to 2½ ft.	\$2.00	\$17.50
18 to 24 in.	1.75	15.00	2½ to 3 ft.	2.25	20.00

TOM THUMB ARBOVITAE (*Thuja Occidentalis Elwangeriana*). A low, broad, pyramidal shaped plant with slender branches. Resembles both American Arbovitae and Red Cedar.

12 to 15 in.	\$0.75	\$6.50	18 to 24 in.	\$1.25	\$10.00
15 to 18 in.	1.00	8.00	2 to 3 ft.	2.00	17.50

CEDAR

CEDRUS DEODARA. A large-growing evergreen with silvery-green foliage and drooping branches.

2 to 3 ft.	\$2.50	\$22.50	3 to 4 ft.	\$3.00	\$27.50
-----------------	--------	---------	-----------------	--------	---------

CRYPTOMERIA

CRYPTOMERIA LOBBI COMPACTA (Cave Cryptomeria). A tall slender tree, lovely the year around. Splendid wintery effect of dark bronze-tinted foliage.

18 to 24 in.	\$2.00	\$17.50	2 to 3 ft.	\$2.50	\$22.50
-------------------	--------	---------	-----------------	--------	---------

HEMLOCK

CANADIAN HEMLOCK (*Tsuga Canadensis*). Graceful tree with dark green foliage; very hardy.

12 to 18 in.	\$1.25	\$10.00	2 to 3 ft.	\$2.50	\$22.50
18 to 24 in.	1.75	15.00	3 to 4 ft.	3.00	27.50

JUNIPERS

HORIZONTAL JUNIPER (*Juniperus Horizontalis*). Very low compact growth, making a dense mat. Soft blue color, grows close to the ground.

24 to 30 in.	\$2.00	\$17.50	30 to 36 in.	\$2.50	\$22.50
-------------------	--------	---------	-------------------	--------	---------

IRISH JUNIPER (*Juniperus Hibernica*). Trees form dense slender cones of silvery green.

12 to 18 in.	\$0.40	\$3.00	2 to 3 ft.	\$1.25	\$10.00
18 to 24 in.60	5.00	3 to 4 ft.	1.75	15.00

MEYER JUNIPER (*Juniperus Squamata Meyeri*). Upright, close irregular grower, with a beautiful bluish foliage; well branched and wide at the bottom.

12 to 18 in.	\$2.50	\$22.50	18 to 24 in.	\$3.00	\$27.50
-------------------	--------	---------	-------------------	--------	---------

PFITZERS JUNIPER (*Juniperus Pfitzeriana*). Broad, bushy with gray green branches.

12 to 18 in.	\$1.25	\$10.00	2 to 3 ft. spread..	\$2.50	\$22.50
18 to 24 in.	2.00	17.50	3 to 3½ ft. spread..	3.25	30.00

PROSTRATE JUNIPER (*Juniperus Communis Canadensis*). The leaves are sharp pointed, gray-green, and light silvery beneath.

3 to 4 ft.	\$3.25	\$27.50	4 to 5 ft.	\$4.00	\$37.50
-----------------	--------	---------	-----------------	--------	---------

PURPLE SPREADING JUNIPER (*Juniperus Depressa Plumosa*). New, exceedingly hardy, assumes a very attractive purple color in winter. Transplants readily.

12 to 18 in.	\$1.25	\$10.00	2 to 3 ft.	\$2.25	\$20.00
18 to 24 in.	1.75	15.00	3 to 4 ft.	2.75	25.00

If you plan new landscaping work or alterations of present plantings, ask our representative to call. His training will help you in arriving at a satisfactory solution of your planting problems.

SAVIN JUNIPER (*Juniperus Sabina*). Low growing, very dwarf. Dark green foliage, very desirable. Never gets large.

	Each	10		Each	10
12 to 18 in.	\$1.25	\$10.00	2 to 3 ft. spread..	\$2.50	\$22.50
18 to 24 in.	2.00	17.50	3 to 4 ft. spread..	3.25	30.00

SILVER CEDAR (*Juniperus Virginiana Glauca*). This evergreen is of blue-green color which, at a distance, shows a rich silver.

18 to 24 in.	\$2.25	\$20.00	2 to 2½ ft.	\$2.75	\$25.00
-------------------	--------	---------	------------------	--------	---------

SPINY GREEK JUNIPER (*Juniperus Excelsa Stricta*). Gray green foliage, compact, pyramidal, well-shaped.

8 to 12 in.	\$0.80	\$7.50	2½ to 3 ft.	\$3.25	\$30.00
12 to 18 in.	1.20	10.00	3 to 3½ ft.	4.25	40.00
18 to 24 in.	1.60	12.50	3½ to 4 ft.	5.00	45.00
2 to 2½ ft.	2.25	20.00			

SWEDISH JUNIPER (*Juniperus Suecica*). A slow grower; columnar form, similar to Irish Juniper. Gray green needles. For formal use. Very hardy.

2 to 2½ ft.	\$2.25	\$20.00	2½ to 3 ft.	\$2.75	\$25.00
------------------	--------	---------	------------------	--------	---------

TAMARIX JUNIPER (*Juniperus Tamariscifolia*). Very dense with bluish green foliage. Very spreading habit of growth.

12 to 15 in.	\$1.50	\$12.50	18 to 24 in.	\$2.50	\$22.50
15 to 18 in.	2.00	17.50			

VIRGINIA JUNIPER (*Juniperus Virginiana*). Has a rich, dark green color and resembles the Italian Cypress. In spring the color is a very bright green, turning to dark green during the summer.

18 to 24 in.	\$0.75	\$6.00	4 to 5 ft.	\$2.75	\$25.00
2 to 3 ft.	1.00	8.00	5 to 6 ft.	3.75	35.00
3 to 4 ft.	1.75	15.00	6 to 7 ft.	4.75	45.00

WHITE LEAF CHINESE JUNIPER (*Juniperus Chinensis Alba Variegata*). Broad pyramidal shape. Bright metallic blue foliage spotted with pure white tips.

12 to 18 in.	\$1.00	\$8.00	2 to 2½ ft.	\$2.50	\$22.50
18 to 24 in.	1.75	15.00	2½ to 3 ft.	2.75	25.00

FIRS

BALSAM FIR (*Abies Balsamea*). Compact growth, dark green foliage. Conical form.

8 to 12 in.	\$1.00	\$8.00	18 to 24 in.	\$2.25	\$20.00
12 to 15 in.	1.50	12.50	2 to 3 ft.	2.50	22.50
15 to 18 in.	2.00	17.50			

DOUGLAS FIR (*Pseudotsuga Douglassi*). Strong grower with soft dark green foliage.

12 to 18 in.	\$1.00	\$9.00	2 to 3 ft.	\$2.00	\$17.50
18 to 24 in.	1.25	11.50	3 to 4 ft.	2.50	22.50

WHITE FIR (*Abies Concolor*). Tall, rapid grower, rich silvery needles.

15 to 18 in.	\$2.00	\$17.50	2 to 2½ ft.	\$2.50	\$22.50
18 to 24 in.	2.25	20.00			

RETINOSPORAS

RETINOSPORA FILIFERA (Thread-like Retinospora). Foliage deep green; medium height.

18 to 24 in.	\$2.25	\$20.00	3 to 4 ft.	\$2.75	\$25.00
2 to 3 ft.	2.50	22.50			

RETINOSPORA LUTESCENS (Golden Globe Retinospora). Bright yellow tipped branches, forms a low, broad bush.

8 to 12 in.	\$0.80	\$7.00	15 to 18 in.	\$1.75	\$15.00
12 to 15 in.	1.50	12.50	18 to 24 in.	2.25	20.00

RETINOSPORA OBTUSA (Hinoki Cypress). A slender rapid growing plant. Foliage dark green with graceful, drooping, feathery sprays.

18 to 24 in.	\$1.50	\$12.50	3 to 4 ft.	\$2.50	\$22.50
2 to 3 ft.	2.00	17.50			

RETINOSPORA PISIFERA (Sawara Retinospora). Foliage bright green; a hardy, rapid growing tree, open and tall in growth with erect branches.

18 to 24 in.	\$1.50	\$12.50	3 to 4 ft.	\$2.50	\$22.50
2 to 3 ft.	2.00	17.50			

RETINOSPORA PISIFERA AUREA (Golden Sawara Retinospora). Same as Retinospora Pisifera except branches are tipped with gold.

12 to 18 in.	\$1.00	\$7.50	3 to 3½ ft.	\$2.25	\$20.00
2 to 2½ ft.	1.25	10.00	3½ to 4 ft.	2.75	25.00
2½ to 3 ft.	1.75	15.00			

RETINOSPORA PLUMOSA (Plume-like Retinospora). Soft deep green foliage. A strong grower.

	Each	10		Each	10
12 to 15 in.	\$0.80	\$7.00	2 to 3 ft.	\$2.00	\$17.50
15 to 18 in.	1.25	10.00	3 to 4 ft.	2.75	25.00
18 to 24 in.	1.40	12.50	4 to 5 ft.	4.00	35.00

RETINOSPORA PLUMOSA AUREA (Golden Plume-like Retinospora). Soft light green foliage Distinctly tipped with yellow.

8 to 12 in.	\$0.60	\$5.00	2 to 3 ft.	\$2.00	\$17.50
12 to 15 in.90	8.00	3 to 4 ft.	2.50	22.50
15 to 18 in.	1.25	10.00	4 to 5 ft.	3.50	32.50
18 to 24 in.	1.50	12.50			

RETINOSPORA SQUARROSA VEITCHII (Moss Retinospora). Foliage sulphur blue, feathery and dense. Broad pyramidal outline.

8 to 12 in.	\$0.50	\$4.00	3 to 4 ft.	\$2.50	\$22.00
12 to 15 in.80	7.00	4 to 5 ft.	4.00	35.00
15 to 18 in.90	8.00	5 to 6 ft.	6.00	50.00
18 to 24 in.	1.25	10.00	6 to 8 ft.	8.00	70.00
2 to 3 ft.	1.50	12.50	8 to 9 ft.	10.00	

RETINOSPORA SULPHUREA (Sulphur-like Retinospora). Sulphur plumed, soft yellowish green foliage; very compact.

8 to 12 in.	\$0.50	\$4.00	18 to 24 in.	\$1.25	\$10.00
12 to 15 in.80	7.00	2 to 2½ ft.	1.50	12.50
15 to 18 in.90	8.00	2½ to 3 ft.	2.00	17.50

SPRUCE

BLACK HILL SPRUCE (*Picea Canadensis Albertiana*). Foliage varies from green to bluish tint, and is noted for its bright fresh color. Slow grower, compact and bushy in habit of growth.

1½ to 2 ft.	\$1.25	\$10.00	2½ to 3 ft.	\$2.25	\$20.00
2 to 2½ ft.	1.75	15.00			

COLORADO BLUE SPRUCE. (*Picea Pungens Glauca*). Tall, conical in shape. Foliage silver blue.

12 to 18 in.	\$2.50	\$22.50	18 to 24 in.	\$3.50	\$32.50
-------------------	--------	---------	-------------------	--------	---------

KOSTERS BLUE SPRUCE (*Picea Pungens Glauca Kosteri*). One of the most popular evergreens. Deep blue color.

12 to 18 in.	\$5.00		24 to 30 in.	\$14.00	
18 to 24 in.	8.00				

NORWAY SPRUCE (*Picea Excelsa*). Perfectly hardy. Compact growth. Green foliage.

8 to 12 in.	\$0.40	\$3.00	2 to 3 ft.	\$1.50	\$12.50
12 to 15 in.60	5.00	3 to 4 ft.	2.00	17.50
15 to 18 in.70	6.00	4 to 5 ft.	3.00	25.00
18 to 24 in.	1.00	9.00			

CYPRESS

LAWSON'S BLUE CYPRESS (*Chamaecyparis Lawsoniana*). Rich blue; erect grower.

1 to 1½ ft.	\$0.80	\$7.00	2 to 2½ ft.	\$2.50	\$20.00
1½ to 2 ft.	1.50	12.50	2½ to 3 ft.	3.00	25.00

YEWS

JAPANESE SPREADING YEW (*Taxus Cuspidata*). Dwarf, dense habit of growth. Very hardy.

12 to 15 in.	\$1.75	\$15.00	18 to 24 in.	\$2.50	\$22.50
15 to 18 in.	2.25	20.00			

UPRIGHT JAPANESE YEW (*Taxus Cuspidata Capitata*). Slow growing; dense green foliage of upright growth.

15 to 18 in.	\$2.00	\$17.50
-------------------	--------	---------

PINES

AUSTRIAN PINE (*Pinus Austriaca*). Strong spreading growth, round form, with regularly arranged branches.

12 to 18 in.	\$0.70	\$6.00	3 to 4 ft.	\$2.75	\$25.00
18 to 24 in.	1.75	15.00	4 to 5 ft.	3.75	35.00
2 to 3 ft.	2.25	20.00			

DWARF MOUNTAIN PINE (*Pinus Mughus*). Dwarf spreading type, with short needles.

8 to 10 in. spread.	\$0.80	\$7.00	15 to 18 in. spread.	\$1.75	\$15.00
10 to 12 in. spread.	1.00	8.00	18 to 24 in. spread.	2.25	20.00
12 to 15 in. spread.	1.25	10.00			

SCOTCH PINE (*Pinus Sylvestris*). Foliage bluish green. Very neat in growth.

12 to 18 in.	\$0.70	\$6.00	4 to 5 ft.	\$4.00	\$35.00
18 to 24 in.	1.75	15.00	5 to 6 ft.	4.50	40.00
2 to 3 ft.	2.25	20.00	6 to 7 ft.	5.00	45.00
3 to 4 ft.	2.75	25.00			

USE AZALEAS FOR DISPLAY

BROAD LEAVED EVERGREENS

AMERICAN HOLLY (*Ilex Opaca*). Foliage intensive green. Produces an abundance of red berries.

	Each	10	
2 to 3 ft. specimen plants B & B	\$2.50	\$22.50	
3 to 4 ft. specimen plants B & B	3.25	27.50	

EVERGREEN PRIVET (*Ligustrum Lucidum*). Leaves are large, glossy, dark green; flowers white with black berries in winter.

	Each	10		Each	10
1½ to 2 ft.	\$1.50	\$12.50	2 to 3 ft.	\$2.00	\$17.50

BUSH ARBUTUS (*Abelia Grandiflora*). Dwarf, glossy foliage, pink flowers.

DAPHNE CNEORUM

An evergreen with green foliage, low and spreading. Pink flowers with a very delightful fragrance. Blooms in April and May, also September, October and November. Seldom grows more than one foot in height, but makes a spread of two or three feet after a long number of years growing. One of the best plants we have in our nursery. No home grounds are complete without this plant.

	Each	10		Each	10
6 to 8 in.	\$0.80	\$7.00	15 to 18 in.	\$2.00	\$17.50

12 to 15 in.	1.75	15.00			

NANDINA DOMESTICA

An evergreen shrub of merit that should be included in every planting whether large or small. The color in summer being a light green with a reddish cast, long narrow leaves. In winter it casts its beautiful colors of red leaves and red berries making it very noticeable whenever used in a planting scheme.

This plant while half hardy requires protection during the winter months. The best way to use this plant is in a planting of Broad Leaved Evergreens, by doing so ample protection can be made.

	Each	10
18 to 24 in. B & B	\$1.50	\$12.50
24 to 30 in. B & B	2.00	17.50

HEDGE PLANTS

We pay transportation on all Hedge plant orders received within a radius of 500 miles of Selbyville.

CALIFORNIA PRIVET. California Privet is one of the leading hedge plants. Its foliage is of the deepest, richest green which stays on until late winter. Very hardy; easily and quickly pruned.

10 to 50 sold at 10 rate; 50 to 300 at 100 rate; 300 or more at 1000 rate.

	10	100	1000
6 to 12 in.	\$0.30	\$2.00	\$15.00

3 yr., 2½ to 3 ft.45	3.50	30.00	250.00

RED LEAF BARBERRY

(BERBERIS ATROPURPUREA)

Similar in all respects to the green leaf Barberry which is so popular for mixing in the shrubbery border, as single specimens, or for planting in clumps on the lawn as well as for foundation plantings and for hedges. But the foliage of this new variety is of a rich lustrous bronzy red, similar to the richest red Japanese Maples. It holds its color well throughout the entire summer. In the fall its foliage changes to vivid orange, scarlet and red shades, more brilliant and more effective than in the ordinary Japanese Barberry. It also carries the brilliant scarlet berries which remain on the plant the entire winter. It is important that this plant be set in a position where it will get a full exposure to the sun to retain the brilliant red color throughout the season.

	Each	10	100
2 yr. strong plants, 9 to 12 in.	\$0.20	\$1.50	\$10.00
2 yr. strong plants, 12 to 15 in.30	2.00	15.00
2 yr. strong plants, 15 to 18 in.35	3.00	20.00
2 yr. strong plants, 18 to 24 in.40	3.50	25.00

AMERICAN ELM

SHADE AND ORNAMENTAL TREES

We pay transportation charges on all Shade and Ornamental Tree orders received within a radius of 500 miles of Selbyville, if the order amounts to \$10.00 or more.

Less than 10 sold at the each rate; 10 to 30 at the 10 rate; 30 or more at the 100 rate.

MAPLES

ASH LEAF MAPLE (*Acer Negundo*). Dwarf, stands drought and cold well. Suitable for seashore.

	Each	10	100
8 to 10 ft.	\$2.25	\$20.00	
10 to 12 ft.	2.75	25.00	

JAPANESE BLOOD LEAF MAPLE (*Acer Palmatum Atropurpureum*). Leaves bright red. Dwarf shrub form.

1½ to 2 ft.	\$3.00		
------------------	--------	--	--

NORWAY MAPLE (*Acer Platanoides*). A large handsome tree with deep green foliage. Very hardy and extensively planted.

2 yr. heads 5 to 6 ft. stems	1.25	10.00	85.00
2 yr. heads 6 to 7 ft. stems	1.35	11.00	90.00

CATALPA SPECIOSA (Western Catalpa). Large, hardy and rapid grower. White flowers.

5 to 6 ft.	\$0.40	\$3.00	\$25.00
6 to 8 ft.50	4.00	30.00
8 to 10 ft.75	7.00	60.00

ELMS

AMERICAN ELM (*Ulmus Americana*). A fine wide spreading tree, dark green leaves. Very hardy and one of the best.

5 to 6 ft.	\$0.50	\$4.00	\$30.00
6 to 7 ft.60	5.00	40.00
7 to 8 ft.	1.00	9.00	65.00
8 to 10 ft.	1.40	12.00	100.00
10 to 12 ft.	2.25	20.00	175.00

CHINESE ELM (*Ulmus Pumila*). A rapid growing tree of pyramidal habit. Very good for street planting.

5 to 6 ft.	\$1.00	\$9.00
6 to 8 ft.	1.50	12.50
8 to 10 ft.	2.00	17.50

MOLINE ELM (*Ulmus Moline*). A new variety of extremely strong growth with large handsome deep green foliage. Very desirable.

6 to 8 ft.	\$1.00	\$8.00
-----------------	--------	--------

MAGNOLIAS

MAGNOLIA SOULANGEANA (Saucer Magnolia). Large purplish pink and white flowers in May before leaves appear.

2 to 3 ft.	\$3.00	\$25.00
-----------------	--------	---------

POPLARS

LOMBARDY POPLARS (*Populus nigra italica*). A tall, rapid growing spiral-like tree.

4 to 5 ft.	\$0.35	\$3.00	\$25.00
5 to 6 ft.40	3.50	30.00
6 to 7 ft.55	5.00	40.00
7 to 8 ft.70	6.00	50.00
8 to 10 ft.80	7.00	60.00
10 to 12 ft.	1.15	10.00	90.00

CHINESE LOMBARDY POPLAR. Foliage intense glossy green. A very attractive tree.

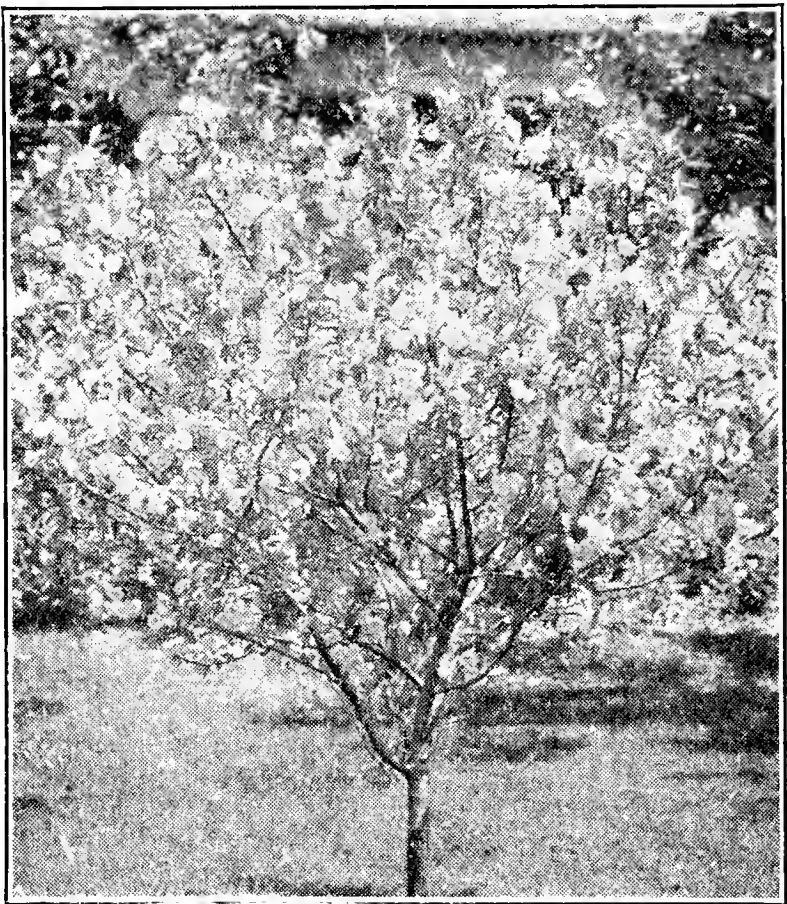

8 to 10 ft.	\$1.00	\$9.00
10 to 12 ft.	1.25	10.00

TULIP POPLAR (*Liriodendron Tulipifera*). A tall tree of pyramidal habit with broad glossy fiddle-shaped leaves. Tulip-like flowers.

5 to 6 ft.	\$0.90	\$8.00
6 to 7 ft.	1.00	9.00
7 to 8 ft.	1.15	10.50
8 to 10 ft.	1.25	11.50
10 to 12 ft.	1.75	16.50
12 to 14 ft.	2.00	17.50

WILLOWS

	Each	10	100
GOLDEN BARK WEEPING WILLOW (<i>Salix Babylonica Ramulis Aureis</i>). Tree of weeping habit, with yellow branches.			
6 to 7 ft.	\$0.60	\$5.00	\$40.00
7 to 8 ft.75	6.50	50.00
8 to 10 ft.85	7.50	60.00
THURLOW'S WEEPING WILLOW (<i>Salix Elegantissima</i>). Tree large, spreading with grey green bark and foliage. Very hardy.			
7 to 8 ft.	\$1.10	\$10.00	\$90.00
8 to 10 ft.	1.35	12.50	100.00
WISCONSIN WEEPING WILLOW (<i>Salix Blanda</i>). A large round headed tree. Will thrive in any locality.			
7 to 8 ft.	\$1.10	\$10.00	\$90.00
8 to 10 ft.	1.35	12.50	100.00

BETCHEL'S FLOWERING CRAB

MISCELLANEOUS SHADE AND
ORNAMENTAL TREES

WHITE BIRCH (<i>Betula Alba</i>). A rapid growing erect tree having triangular shaped leaves. Its white bark and spray-like branches make it very effective among Evergreens.			
8 to 10 ft.	\$2.00	\$17.50	
MIMOSA . A beautiful shade tree of spreading habits with feathery foliage and crimson-tinted blossoms.			
6 to 8 ft.	\$1.50		
AMERICAN LINDEN (<i>Tilia Americana</i>). A tall stately tree with large shining cordate leaves.			
6 to 8 ft.	\$1.75	\$15.00	
BETCHEL'S FLOWERING CRAB (<i>Malus Ioensis</i>). Flowers in May. Delicate pink double roses of delicate fragrance.			
4 to 6 ft.	\$1.00	\$9.00	\$80.00
BLACK LOCUST (<i>Robinia Pseudacacia</i>). Tall tree, flowers white and very fragrant in May.			
10 to 12 ft.	\$1.25	\$10.00	
12 to 15 ft.	1.50	14.00	

	Each	10	100
CUT LEAF WEEPING BIRCH (<i>Betula Pendula Gracilis</i>). Famed for its beauty and graceful drooping habit. Bark silvery white.			
5 to 6 ft.	\$1.50	\$12.50	
6 to 8 ft.	1.75	15.00	
8 to 10 ft.	2.00	17.50	

CRAPE MYRTLE. Flowers during August and September. Leaves bright green. (Spring planting only).

Crimson No. 1 plants	\$0.80	\$7.00	\$60.00
Pink, No. 1 plants80	7.00	60.00
White, No. 1 plants80	7.00	60.00
Purple, No. 1 plants80	7.00	60.00

DOGWOOD, RED FLOWERING (*Cornus Florida Rubra*). Rose-pink flowers in May and June.

2 to 3 ft.	\$2.00	\$17.50	\$150.00
-----------------	--------	---------	----------

DOUBLE RED FLOWERING PEACH (*Amygdalus Persica*). With very beautiful large red flowers before leaves appear.

2 to 3 ft.	\$0.25	\$2.00	\$15.00
3 to 4 ft.35	3.00	20.00
4 to 5 ft.45	3.50	25.00

DOUBLE WHITE FLOWERING PEACH (*Amygdalus Persica*). Foliage light green. Tree is covered with large double white blooms early in spring.

2 to 3 ft.	\$0.25	\$2.00	\$15.00
3 to 4 ft.35	3.00	20.00
4 to 5 ft.45	3.50	25.00

EUROPEAN MOUNTAIN ASH (*Sorbus Aucuparia*). A beautiful tree with green fern-like foliage, with clusters of bright red berries.

6 to 8 ft.	\$1.75	\$15.00	
-----------------	--------	---------	--

HORSE CHESTNUT (*Aesculus Hippocastanum*). Very compact, flowers white, leaves dark green.

6 to 8 ft.	\$2.25	\$17.50	
-----------------	--------	---------	--

JAPANESE DOUBLE FLOWERING CHERRY, WHITE (*Cerasus Avium Alba Plena*). Beautiful small tree. Enlivens border planting with its bloom.

3 to 4 ft.	\$2.00	\$17.50	
4 to 5 ft.	2.50	20.00	

JAPANESE DOUBLE FLOWERING CHERRY, PINK (*Cerasus Sieboldi*). Strong growing tree producing showy pink double flowers with the leaves, or just a little in advance of them.

3 to 4 ft.	\$2.00	\$17.50	
4 to 5 ft.	2.50	20.00	

JAPANESE WEEPING FLOWERING CHERRY (*Cerasus Pendula*). Flowers in May, covering the branches with a rosy mass of blooms.

5 ft. stems, 2 yr. heads	\$3.00	\$27.50	
--------------------------------	--------	---------	--

JUDAS TREE (Red Bud) (*Cercis Canadensis*). A small growing tree covered with bright pink blossoms early in spring before the leaves appear.

5 to 6 ft.	\$0.75	\$6.00	\$50.00
6 to 8 ft.	1.00	8.00	70.00
8 to 10 ft.	1.25	10.00	90.00

MAIDENHAIR TREE (*Ginkgo Biloba*). A tall avenue tree. Will thrive in smoky cities.

6 to 8 ft.	\$3.00		
-----------------	--------	--	--

PAUL'S DOUBLE SCARLET THORN (*Crataegus Oxycantha Splendens*). Small tree, very erect quick growing. Flowers bright carmine in early summer.

4 to 5 ft.	\$1.25	\$10.00	
-----------------	--------	---------	--

PINK FLOWERING PLUM (*Prunus Triloba*). Small pink flowering tree. Very attractive.

2 to 3 ft.	\$0.40	\$3.50	\$25.00
3 to 4 ft.50	4.50	35.00

PIN OAK (*Quercus Palustris*). Graceful, spreading pyramidal habit. Leaves dark green and glossy; orange-scarlet in fall.

DAHLIAS

We pay transportation charges on all Dahlia orders received within a radius of 500 miles of Selbyville.

For the benefit of those who are not familiar with the different types of Dahlias we will give a brief description of each class.

Decorative. Large, double, full to the center, flat, rather than ball shaped; broad, flat, rather loosely arranged petals.

Show. Double, globular or ball shaped; petals more or less quilled; the old-fashioned type of Dahlia.

Pompon. Miniature Show Dahlias; should be under two inches in diameter.

Cactus. Double; petals are long, narrow, incurved or twisted; have a sort of spidery appearance.

Hybrid Cactus. A cross between the true Cactus and Decorative; large blossoms; petals broader and larger than the true Cactus.

Peony Flowered. Semi-double flowers with open centers; petals more or less flat. Sometimes called "Art Dahlias."

CITY OF PORTLAND. Salmon pink. The best pink variety. Green foliage.

FIREBIRD. Magnificent red flowers. Foliage bronze color. A good grower.

GLADIATOR. Dwarf variety. Color yellow with red spots.

J. D. EISLE. Blooms before any other variety of cannas. Large red flowers. Green foliage.

KATE GRAY. Healthy grower. Flowers immense size, orange color.

KING HUMBERT. The grandest Canna ever introduced. Large heart shaped leaves, brown over bronze. Flowers velvety orange-scarlet, flecked carmine; rose tinted at margin and base. Bronze foliage.

MADAM CROZY. Dwarf variety. Color red with yellow edge.

PRESIDENT. Magnificent red. Flowers immense size. Green foliage.

RICHARD WALLACE. Light yellow, green foliage. A very strong grower.

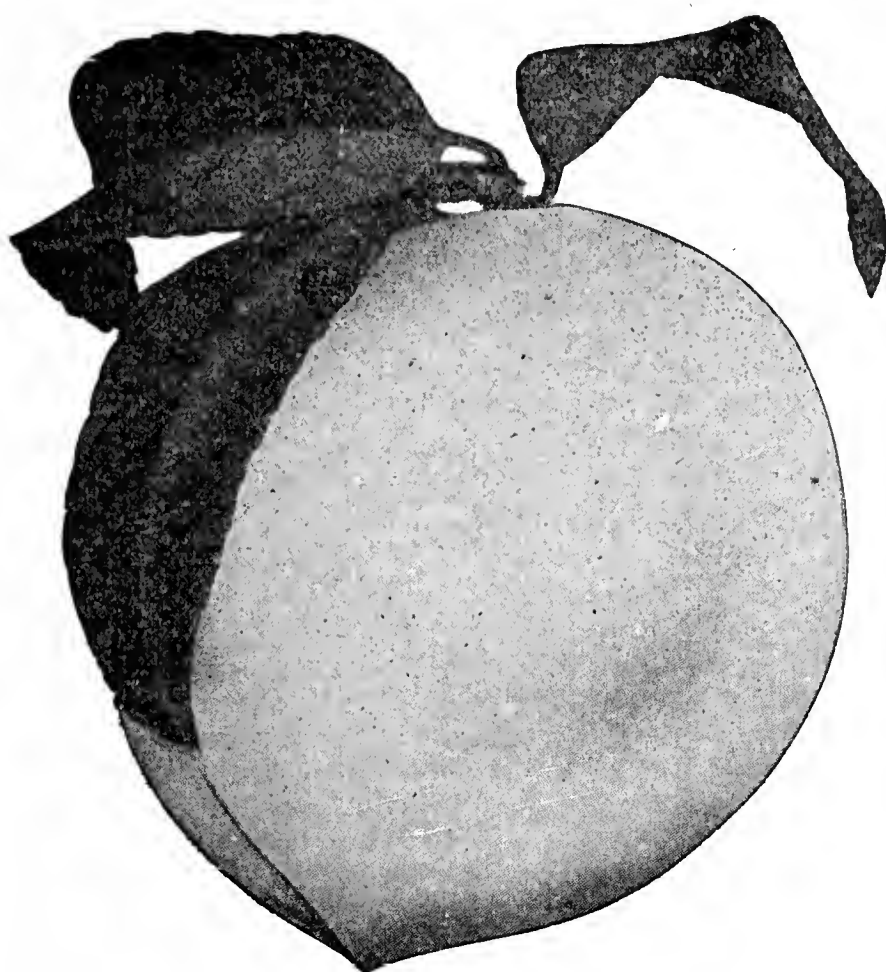

UNCLE SAM. Bright scarlet. Green leaves. A very tall grower.

WILLIAM SAUNDERS. Foliage rich bronze, flowers scarlet red; very showy.

WINTZERS COLOSSAL. Striking vivid scarlet. Green foliage.

WYOMING. Flowers bright orange, slightly flecked with rose. Foliage rich purplish bronze.

Prices on all nursery stock, both ornamental and general, are the lowest they have ever been. The quality of Buntings' trees, shrubs and plants remain at the same high standard they have always maintained. We offer complete landscape service, free of charge, to our customers.

ELBERTA PEACH

PEACH TREES

We pay transportation charges on all Peach Tree orders received within a radius of 500 miles of Selbyville.

	Each	10	100	1000
2 to 3 ft.	\$0.25	\$1.60	\$11.00	\$90.00
3 to 4 ft.30	2.00	13.50	115.00
4 to 5 ft.40	2.50	18.00	160.00
5 to 6 ft.50	3.25	22.50	180.00

One to four trees or plants of one variety sold at each rate; 5 to 30 of one variety at the 10 rate; 30 to 250 of one variety at the 100 rate; 250 or more at the 1000 rate.

ALEXANDER. Very early. Medium to large. Deep rich red in color flesh white, juicy and sweet. Clingstone.

BELLE OF GEORGIA. Ripens here the first to fifteenth of August. Fruit is large, white with red cheek; flesh white, firm of excellent flavor. Freestone.

BERK'S FAVORITE. Ripens September 15th to 20th. Size large, skin white with red cheek, flesh white. A good cropper and unexcelled shipper.

BRACKETT. Follows Elberta in ripening. Size large to very large. Orange yellow skin tinted carmine. Flesh is deep yellow. Freestone.

BILYEU. Large; nearly covered with dark red; flesh white, rich, juicy and firm. A good shipper; rather late. Middle to last of October.

CARMAN. A very hardy peach, ripening here about the middle of July; skin pale yellow, with blush on sunny side; flesh white tender, sweet and melting.

CHAMPION. Skin is of a rich creamy white with a red cheek; flesh creamy white, sweet and delicious, rich and juicy. Very large. Ripens about July 20th.

CHINESE CLING. Clingstone. Medium to large in size. Flesh yellow, highly flavored. Ripens in September.

CRAWFORD'S EARLY. Freestone, large, oblong, yellow with deep red cheek; flesh yellow, juicy and rich, excellent flavor.

CRAWFORD'S LATE. Ripens after Elberta. Freestone. High quality and very large size; flesh deep yellow; skin yellow with broad dark red cheek.

EARLY ELBERTA. Exactly the same in both foliage and fruit as the old reliable Elberta. Ripens a week before this well known variety.

EARLY ROSE. Small to medium size. White cling. A popular early variety.

ELBERTA. Midseason. A valuable large peach of good quality; fruit large; yellow with red cheek; juicy and extremely high flavored; flesh yellow; freestone. The leading market variety. Ripens here about the middle of August.

ENGLE MAMMOTH. Large, yellow. Resembles Crawford's Late. Good quality. Freestone.

GOLDEN JUBILEE. Yellow; freestone; ripens with carman. originated by the New Jersey Agricultural Experiment Station.

FITZGERALD. Fruit large, brilliant yellow with red cheek; ripens after Crawford's Early. Freestone. Extremely hardy.

FOX SEEDLING. White; freestone; ripens about September 15th. Fruit is very large and of good quality and flavor.

GLOBE. Freestone. Skin golden yellow with red cheek. Flesh yellow. Fruit very large and handsome. Midseason.

GOLD DROP. Late, large, yellow, and very hardy. Heavy bearer. Freestone.

GREENSBORO. Ripens here from June 25th to July 10th. Large, white with a red cheek; rich and melting, juicy; tree a strong grower.

HILEY. Ripens about a week before Belle of Georgia. Tree very hardy. A large creamy white peach with a rich blush on the sunny side. Freestone.

IRON MOUNTAIN. Ripens September 1st. Freestone. Fruit is of large size. Color white.

J. H. HALE. One of the best sorts for market or garden. Fruit is very large, round, quality excellent. Skin yellow finely colored, flesh yellow, sweet and melting. Ripens just before Elberta. A very good one.

KRUMMEL. Freestone. Season of ripening in Delaware about September 10th to 20th. Fruit is quite large, fine flavor; skin yellow, splashed with red.

MAYFLOWER. Very early red. Hardy. Freestone.

NIAGARA. Fruit golden yellow, blushed with brilliant red. Midseason. Very large. Freestone.

RED BIRD CLING. Very early, white, cling; extra large with a bright red blush. An excellent shipper. A beautiful peach.

ROBERTA. Yellow; freestone; ripens about ten days after Elberta which variety it resembles very closely. Ripens at a time when peaches always bring good money.

ROCHESTER. Has habits and characteristics of the Crawford, but fully two weeks earlier. Yellow, freestone, good size, very sweet; fine flavor. Ripens middle July.

SALBERTA. Late, large, yellow. Freestone.

SHIPPER'S LATE RED. Freestone. Late, yellow, with an attractive red coloring. Flesh yellow, juicy, sweet and pleasing flavor. Bears young.

SLAPPY. Medium to large size. Early midseason. The best early yellow variety. Freestone.

SOUTH HAVEN. Yellow; early midseason, large, heavy bearer. Freestone.

STUMP. A showy, white fleshed peach with a bright red cheek. Very large; juicy, sweet and good. Is a freestone and ripens near the end of September.

UNEEDA. One of the best clings, and quite early for such a large peach. In appearance it resembles Heath Cling.

WHITE HEATH CLING. Ripens about September 10 to 15th. Fruit extra large, roundish; flesh white, exceedingly juicy. Favorite of all housewives for canning purposes.

WILMA. Large fruit of good quality, yellow blushed with bright dark red; juicy flesh. Freestone. Ripens after Elberta.

YELLOW ST. JOHN. Freestone. Early. Light yellow flesh with a slight tinge of red near pit.

2 yr. 5 to 6 ft.55	4.50	30.00	250.00

The above prices apply except where noted.

One to four trees or plants of one variety sold at each rate; 5 to 30 of one variety at the 10 rate; 30 to 250 of one variety at the 100 rate; 250 or more at the 1000 rate.

BLACKJON (Trade Mark Registered). This apple is the same as the common Jonathan in flavor, quality and productiveness. It is different from the common Jonathan in that it attains an intense bright-red color from two to three weeks earlier and can be picked while hard ripe. Those who like a crisp, juicy Jonathan with a beautiful deep cherry red color can be sure of getting it in the Blackjon.

	Each	10	100
5 to 6 ft.	\$1.25	\$10.00	\$75.00
4 to 5 ft.	1.10	8.50	70.00
3 to 4 ft.85	8.00	60.00

BLACK MACK (Trade Mark Registered). This is a strain of McIntosh which comes two weeks in advance of the regular variety. A solid, deep red which can be picked when in prime condition, which improves shipping and eating qualities and eliminates loss from windfalls.

	Each	10	100
3 to 4 ft.	\$0.85	\$7.50	\$50.00
4 to 5 ft.	1.00	8.00	55.00
5 to 6 ft.	1.10	9.00	60.00

BALDWIN. Large, roundish, skin deep red; flesh juicy, crisp, sub-acid, good flavor; very vigorous and productive. The best all-around winter apple for New England and Northern States. Splendid keeper. December to March.

CORTLAND. The fruit is medium to large in size, of a bright red color. Flesh is pure white. Very good flavor.

CRIMSON BEAUTY. Tree strong grower. Fruit ripens early before Transparent. Medium size, skin waxy green with pale blush.

DELICIOUS. Winter apple. Keeps well, color red and yellow; fine grained and quite juicy; flavor slightly acid but very good.

EARLY MCINTOSH. Ripens between Yellow Transparent and Williams Early Red. Same qualities as winter McIntosh.

GRIMES GOLDEN. Very large, skin golden yellow; flesh tender and crisp. A very good fall apple. September to January. Grown in all sections of the country.

GRAVENSTEIN. Vigorous grower, productive; flesh yellow, juicy, tender. Greenish yellow with red stripes. Fall apple.

HYSLOP (Crab Apple). Large, handsome, crimson splashed with dark red. Very prolific. September.

JONATHAN. Most beautiful of all apples. Season November to April. Fruit medium to large, roundish, yellow nearly covered with red, fine grained, tender and finely flavored.

KING DAVID. Early winter. A heavy annual bearer of medium size, dark red apples.

McINTOSH. Medium size, nearly covered with a bright red; flesh yellowish, tender, juicy, sub-acid. October to February.

MAIDEN BLUSH. One of the most beautiful; pale lemon with crimson cheek; flesh white, tender and crisp. October.

MAMMOTH BLACK TWIG. Very similar to Paragon.

NORTHERN SPY. Large, bright, light red and yellow. Flesh juicy, rich, crisp, tender, aromatic, of good flavor. Tree strong grower. November to March.

PARAGON. Winter. A round apple of extra large size; skin smooth yellowish, covered with deep red, the general effect being dark red, flesh tender, tinged with yellow; crisp, sub-acid, aromatic, of excellent quality in every way.

RED ASTRACHAN. Large, nearly covered with deep crimson; juicy rich, acid, beautiful. Tree a vigorous grower. A good bearer. August.

RHODE ISLAND GREENING. Very large winter apple, having a rich and acid flavor, tender and juicy. Skin yellow with red cheek.

ROME BEAUTY. Large, roundish, slightly conical, with bright red on a pale yellow background; fine grained, juicy, good quality.

RED ROME (Trade Mark Registered). A brilliant, solid-red Rome Beauty that produces over 50 per cent more Extra Fancy apples for color grade than common Rome. Red Rome is a beautiful apple, identical in quality, productiveness and other characteristics of the common Rome—except for a greatly superior color. This great improvement in color overcomes one of the most serious objections to the common Rome Beauty.

SHOTWELL RED DELICIOUS (Trade Mark Registered). Excelled by no other improved Red Delicious on the market. This tree originated from a sport of the regular Delicious, and is exactly like it in growth of tree and productiveness. Its color is a very rich red and occurs three to four days in advance of any of the improved red strains of Delicious apples.

	Each	10	100
5 to 6 ft.	\$1.10	\$9.00	\$60.00
4 to 5 ft.65	6.00	55.00
3 to 4 ft.60	5.50	50.00

SMOKEHOUSE. Fruit medium to large, uniform size and shape. Color yellow or greenish mottled with rather dark red. Oct. to March.

SPITZENBURG. Productive on rich soil. Medium to large. Yellow overspread with bright red; flesh yellow, sub-acid, with a rich flavor. Season November to March.

STAYMAN'S WINESAP. November to April, but keeps well in May. Large in size, fine appearance, good flavor, juicy and crisp, color red.

WEALTHY. Fall. Almost solid red. Flesh white, tender, crisp, juicy, fine grained. A good keeper.

WINTER BANANA. Size large, golden yellow with bright crimson red. Beautifully shaped. Flesh lemon yellow, fine grained, sub-acid, rich aromatic flavor. Season November to January.

WILLIAM'S EARLY RED. Among the earliest to ripen and the largest of all early apples. A better name for it is "Big Red Apple." Flesh is white, and slightly tart, like Transparent, bears heavily on young trees.

WINESAP. Medium to large size. Red color; flesh yellow, firm, crisp, rich flavor, quality very good. November to May.

YELLOW TRANSPARENT. Fruit medium to large, with a brilliant waxy skin; flesh is tender, crisp and juicy; color yellow.

YORK IMPERIAL. Starts bearing early and bears a good crop each year. Skin bright yellow covered with bright red and striped. Very large.

CHERRY TREES

We pay transportation charges on all Cherry Tree orders received within a radius of 500 miles of Selbyville.

STRAWBERRIES

The growing of good Strawberry plants is one of our specialties. Our plants are grown under the personal supervision of G. E. Bunting who has spent a life's work on Strawberries. Naturally this long experience means much to our customers, because as Strawberry specialists we know the varieties at sight, and keep our plants true to name.

AROMA. (Perfect). Late. Plants are large, very vigorous and healthy; fruit large, roundish, and of bright glossy red. Excellent quality.

BIG LATE. (Imperfect). Late. Vigorous grower. Very productive. Berries very large and rich in color. Will carry to the market in excellent condition.

BIG JOE. (Perfect). Late. Ripens with Chesapeake, about three days before Gandy. Fruit is firm, of large size, and has a good flavor. If you are not growing Joe plant heavily of them this spring.

BELLMAR. Originated by the U. S. Dept. of Agriculture. The Bellmar (U. S. D. A. No. 655) strawberry originated from a cross of Missionary x Howard 17 (Premier) made in 1923 at the U. S. Plant Field Station near Glenn Dale, Md., and has been planted in many sections of the country since its origin. These plantings being made to give it thorough tests, and it has proven to be a very promising berry for the northern sections of the United States, also does exceedingly well in many sections of the south—more particularly adapted to the northeastern half of the country, because Bellmar is suggested for conditions under which the Howard 17 succeeds and has shown a number of points of superiority over that variety; therefore, it is recommended to growers all over the country who have been successful with Howard 17 (Premier).

The plants are much more vigorous and produce runners much more freely than is the case with Howard 17, and are almost immune from the common leaf spot (*Mycosphaerella fragariae*) also leaf scorch (*Diplocarpon earliana*), which are two wonderful points worth considering. Season of ripening is about the same as Missionary and Premier, in the east slightly earlier. In yield, in some instances, it has not compared with Blakemore; yet the fruit is of a very rich red color and is of much larger size than Blakemore. In other words, it carries Premier's size and productiveness and has Missionary's shipping qualities. The blooms are perfect and contain about as much pollen as Premier, but not as much as Blakemore.

BLAKEMORE. Originated by the U. S. Dept. of Agriculture. The new Blakemore strawberry (U. S. D. A. No. 659) originated from a cross between Missionary and Premier, made in 1923 at the U. S. Plant Field Station at Glenn Dale, Md. During the fruiting season of 1927, in comparison with many other sorts in the field plots at the Plant Field Station, this variety was selected by the head of the research laboratory of the National Preservers' Association, and, after thorough preserving tests were made, this variety was selected as the most satisfactory for preserving and as superior to all known commercial varieties in 1929.

In comparing the fruit of Blakemore with Missionary, the Blakemore in these tests produced more than four times as many U. S. Standard No. 1 grade of berries as the Missionary, and fewer culls. Taking all these facts into consideration, this variety is sure to take the place of Missionary and Klondyke wherever they are grown, and, while it is true, I think, the variety is more adapted to the central and southern sections of the United States, it is also one worth planting in the northern sections, too.

BRANDYWINE. (Perfect). Medium late. Fruit extra large and very firm. Has unexcelled shipping qualities.

BUBACH. Plants make a good growth; foliage dark green, leathery type; produces an abundance of big red berries; medium firm.

CAMPBELL'S EARLY. (Perfect). The earliest variety on our list. Berries beautiful rich red, of large size. A very good variety. Excellent for table use.

CHESAPEAKE. (Perfect). Late. Ripens a little earlier than Gandy. Has a beautiful appearance, is large in size and uniform in shape. Foliage dark green, rich and vigorous.

COOPER. Fruit very large, productive and of good quality. Produces its crop early in the season. Good grower; flavor delicious.

CORSICAN. Same as New York.

DR. BURRILL. (Perfect). Very similar to Senator Dunlap. Excellent for canning and very delicious for table use.

EARLY JERSEY GIANT. Fruit of high quality; ripens early.

GIBSON. (Perfect). Exactly the same as Parsons' Beauty.

GANDY. (Imperfect). Late. Fruit is extremely large and fine flavored. The perfect shape of the berries and the large bright green caps make the berries very beautiful and attractive. Has good shipping qualities.

GLEN MARY. (Perfect). Midseason. Berries are very large size, dark red in color, with prominent seeds of bright yellow. A strong grower. Makes large healthy plants with dark green foliage.

HAVERLAND. (Imperfect). Midseason. Exceedingly productive. Fruit large and very fine. Color light.

HEFLIN EARLY. (Perfect). Early. Very good for table use or for nearby markets. One of the earliest to ripen. Very productive.

HOWARD 17. This variety is the same as Premier. One of the best early berries.

HUNDRED DOLLAR. Same as New York.

JUMBO. Same as New York.

KLONDYKE. (Perfect). Early. Berries uniform in shape and size. Dark red, mild and delicious, very handsome. Plants make a remarkable growth. Foliage light green.

LADY CORNEILLE. (Perfect). For California, the Middle and Southern States we recommend Lady Corneille. It does well on almost any soil. Fruit is dark red in color, large and conical in shape. Very productive.

LUPTON LATE. (Perfect). In many respects quite like Gandy. Comes into bearing a few days ahead of Gandy. Berries large and bluntly conical; its double dark green cap sets the fruit off wonderfully. Produces an abundance of large, bright flame colored berries with shipping qualities unsurpassed.

MARSHALL. (Perfect). Early to midseason. A reliable market berry. Is a strong grower and makes plants freely. Early to mature. The berries are well colored, firm, large and hold their size well throughout the season.

MASCOT. (Perfect). Late. Begins ripening about three days after Gandy. Fruit is very fine and large. Berries light and firm.

McKINLEY. Same as New York.

MISSIONARY. (Perfect). Early to midseason. A strong grower making plants freely. Comes in among the first to ripen; very productive; berries are well colored, firm and large.

NICK OHMER. (Perfect). Medium late berries, large in size. Glossy red, globular in shape, with bright green caps. California growers are having especially good success with them.

NEW YORK. (Perfect). Midseason. Plants are large and healthy. Fruit is extremely large. Well colored. This berry is so popular that it has been introduced under many different names.

OSWEGO. Same as New York.

PREMIER. (Perfect). Early to late. Noted for its long fruiting season. Is adapted to all sections of the country. No weaknesses of any kind. Fruit is large and holds its size well throughout the season. Foliage is smooth, bright and clean. A good plant maker. The most extensively planted variety of strawberries at this time.

PARSONS' BEAUTY. (Perfect). Midseason. Produces a large crop of fruit each year. Plants are splendid growers on any soil that will grow strawberries. Fruit large, conical, uniform shape, dark red and very good quality.

PRIDE OF MICHIGAN. Same as New York.

REDHEART. Originated by the U. S. Dept. of Agriculture. The Redheart (U. S. D. A.) may be compared with Ettersburg 121, now the principal canning variety in the Pacific northwest. It produces runners fairly free—somewhat more freely than Howard 17. The Redheart is a medium-early variety, responding very quickly to warm weather in the spring. It matures much earlier than Howard 17 in the southern states, a few days later in the New England states. The berries are much firmer than most sorts, agreeably acid in flavor, and rank high in dessert quality, above most varieties. The flesh is bright red. The Redheart is so named because of its rich red flesh, which is desirable in a canning berry. We recommend that our customers give them a trial.

RIDGLEY. A cross between Premier and Gandy. Ripens early midseason. Fruit firm, large size. Excellent shipper. Very good.

RYCKMAN. Same as New York.

SAMPLE (Imperfect). Medium late. Extensively planted throughout the entire North. Fruit is very large and firm enough for long distance shipments. A very good cropper.

Note the wonderful root system of our plants.

SOUTHLAND. Originated by the U. S. Department of Agriculture. The Southland (U. S. D. A. No. 44) strawberry originated from a cross of Ettersburg 80 x Howard 17 made in 1920 in the greenhouse at Washington, D. C., and has been planted by the Department in many sections of the country in an experimental way, and found to be a profitable variety—particularly true for the southern states. It is notable in the south for the green appearance of its foliage in the winter, and it makes a more vigorous growth during the short days and the cold weather of winter than any other sorts tested, because it grows throughout the winter in the south. Whenever the temperatures are high enough its fruit buds continue to develop, and it is one of the earliest to bloom and to mature fruit early in the spring. The blossoms are perfect and contain more pollen than most of the other varieties.

SENATOR DUNLAP. (Perfect). Early midseason. A reliable market berry. Very productive. Fruit medium, firm and attractive.

SUCCESS. (Perfect). Midseason. A very good one for home use or nearby markets. Fruit is extra large, bright scarlet color. Flavor mild, sweet and rich.

TENNESSEE PROLIFIC. (Perfect). Midseason. Fruit is very large, bright red, ordinarily firm and attractive. One of the heaviest croppers we know.

UNCLE JIM. Same as New York.

WARFIELD. (Imperfect). Medium to late. Produces a large berry of extraordinary beauty and quality. Very good for home use and nearby markets.

WASHINGTON. This variety makes a very good plant growth, starting early in the spring and remaining vigorous and healthy until after blooming time. Produces a large crop of berries of very good quality, many of them being of fairly large size.

WM. BELT. Midseason to late. Produces a large berry of extraordinary beauty and quality.

FALL OR EVERBEARING STRAWBERRIES

CHAMPION. Produces plants moderately and fruit in abundance. Resembles Progressive very much.

LUCKY STRIKE. A fairly heavy bearer; berries good quality and appearance; not a very vigorous grower. Well worth trying but a very light spring fruiter.

MASTODON. Fruit is large and has a good waxy appearance. Plants are large and healthy. Foliage deep, glossy, black green. Produces an abundance of fruit. The best everbearing variety.

PROGRESSIVE. A wonderful fall-bearing variety. The spring set plants not only produce a big crop of berries the same season, but the runner plants begin to bear fruit as soon as set.

NEW STRAWBERRIES

DORSETT AND FAIRFAX

Offered Spring 1933 for the first time.

Originated by the U. S. Department of Agriculture. We have been close observers of strawberries for a number of years and are thoroughly convinced that Dorsett and Fairfax will take the lead in strawberry production. Have watched them carefully on our grounds for two years, have reports of tests made in other sections of the country, all of which have been so favorable that we have absolute confidence in Dorsett and Fairfax. So much so that if plants were available this spring, we would not, for fruiting purposes, plant any of the early varieties such as Premier, Blakemore, Bellmar, Missionary, etc. Will not attempt to give a detailed description of varieties; instead will quote part of that which has been published by the U. S. Department of Agriculture. We confirm all the Department claims for them.

We believe in Fairfax and Dorsett so much that on an order of 100 plants we agree to refund the price of the plants if quality of the fruit is not satisfactory.

Stock of plants is limited and it is our idea and that of the U. S. Department of Agriculture to spread them over as much of the country as possible this year and for that reason **not more than 500 plants of each variety is available to any one customer** for planting this spring. At this rate we are sure to be sold out of the plants before the end of the planting season. They are available this spring through only one other source, therefore, we suggest placing orders early.

The Dorsett and Fairfax Strawberries

by

Geo. M. Darrow and Geo. F. Waldo
Bureau of Plant Industry, U. S. Department of Agriculture

INTRODUCTION

The two new varieties of strawberries, Dorsett (U. S. D. A. No. 633) and Fairfax (U. S. D. A. No. 613) are being introduced primarily for their high dessert quality. Both varieties, under normal conditions, have shown outstanding dessert quality where grown in Maryland, Delaware and southern New Jersey, while in Oregon, where the Fairfax has been tried, it is also productive and of high quality. Because of their dessert quality, attractive appearance, vigor and productiveness, these varieties are being introduced for trial in sections of the country approximating the latitude of Maryland and New Jersey and possibly farther north, as well as in the Pacific Northwest. They have shown no weaknesses as compared with standard sorts.

THE DORSETT

ORIGIN AND SELECTION

The Dorsett (U. S. D. A. No. 633) originated from a cross of Royal Sovereign x Howard 17 (Premier), made in 1923 at the U. S. Plant Field Station near Glenn Dale, Md. It was among the selections made from this cross in 1925. In 1930 it appeared very promising where tested in Southern New Jersey. Its vigor, productiveness and dessert quality were outstanding. In 1932, trials made in different points in Maryland, Delaware and New Jersey indicated that it was worthy of introduction as a variety for home gardens as well as local and long distance markets in sections having conditions similar to those in the above mentioned states.

CHARACTERIZATION

The Dorsett is a vigorous growing variety under normal conditions, producing many runners and making a heavy matted row, which may become too dense when it is grown on rich soil. The leaves are usually smaller and not so glossy as those of the Fairfax and slightly lighter in color than those of Howard 17. When growing vigorously the petioles become very long. The leaves have not been seriously injured by leaf spot diseases and is considered as resistant as Howard 17.

The flower stalks are not as strong as in the Fairfax, but much more erect than Howard 17. Due to the fact that fewer berries usually mature per flower stalk than in the Fairfax, most of the fruit is borne off the ground. Branching of flower stalks is irregular, both high and low branching occurring. Pollen production is probably about as abundant as in Howard 17 but far less abundant than in Fairfax. The tertiary and quaternary flowers often do not set fruit. Due to the

number of plants which this variety makes, the yield is heavy in a wide matted row though the flower stalks do not set all their flowers.

Its ripening season begins at about the same time as that of Howard 17 but a much larger early crop is produced. In New Jersey its season was longer than that of Howard 17 (June 3rd to June 21st) while at Glenn Dale, Md., it was shorter, extending from May 25th to June 8th.

The fruit is usually conic in shape, sometimes long conic and the early berries somewhat irregular. However they present a very uniform appearance. The color is bright red, lighter than Howard 17, especially late in the season, with greenish, yellow, or reddish seeds, and does not become dark when overripe. The seeds are slightly below the surface, which, together with a somewhat tender epidermis, makes it more susceptible to bruising than Fairfax but not as susceptible as Howard 17; the flesh is pinkish red, somewhat firmer than Howard 17 but not as firm as the Fairfax.

Its flavor is mild sub-acid; under normal conditions it is sweet and very pleasing but not as rich as Fairfax. However, the flavor does not become so objectionable when overripe. In one season of much rainfall in Maryland when berries lacked sweetness, the flavor was better than that of Fairfax. It has succeeded especially well on heavy soil.

TECHNICAL DESCRIPTION OF FRUIT

Form: Blunt conic, sometimes round to long conic; size large except toward end of season; pubescence on pedicel adpressed; calyx slightly reflexed in mature berries, large; berry including apex ripens uniformly; color bright red; seeds greenish, yellow or reddish, slightly sunken; flesh light red; texture medium firm, without cavity, juicy; shipping quality fair; flavor mild subacid, aromatic; dessert quality very high. Season as early or earlier than Howard 17 in Delaware, and Maryland and New Jersey.

THE FAIRFAX

ORIGIN

Although its parentage is not definitely known, the Fairfax (U. S. D. A. No. 613) strawberry is probably the result of a cross of Royal Sovereign x Howard 17 (Premier) made in 1923. It was among the selections made in 1925. In 1928 its characteristic fine appearance, exceptional firmness and high dessert quality were outstanding throughout the whole season. In 1930, in Southern New Jersey, where a large number of U. S. D. A. seedlings were being tested, it, together with the Dorsett, again had these qualities as well as vigor and productiveness.

CHARACTERIZATION

Under the conditions observed, the Fairfax produces more runners than does Howard 17. It is, however, a moderate runner producer, not usually making a dense matted row. The leaves are dark green, somewhat glossy, unusually large, and somewhat cupped. Leaf spot (*Mycosphaerella fragarica*) and leaf scorch (*Diplocarpon Earliana*) have never been serious and it is considered as resistant as Howard 17.

The flower stalks are strong and upstanding. As the fruit matures the clusters tend to fall over but the later ripening berries are usually held off the ground. The flowers of Fairfax are large and are among the most abundant pollen producers of all varieties, producing far more pollen than such eastern varieties as Howard 17 (Premier), Klondyke, Missionary and Aroma. As a result, all the fertile flowers set fully pollinated fruit. All or nearly all the fertile flowers are fertile and set under ordinary conditions.

In season, the Fairfax is about the same as Howard 17. Though it begins blooming early, no appreciable frost damage has been noted. The fruiting season extends over a long period. In 1932, at Glenn Dale, Md., it began ripening on May 25 and continued until June 17. When grown under favorable conditions the primary berries, also the later ripening berries, become very large.

Generally the shape remains very regular throughout the whole season, and it is one of the most uniform in this respect of any variety. Though the primary berries on the cluster are somewhat irregularly wedge shaped, it is typically conic. In color it is a bright red, becoming dark red when overripe. Its seeds are yellowish green. The calyx is large and dark green, enclosing the immature fruit but becoming recurved as the fruit ripens. Because of its color and shape it presents a very handsome appearance. It is much firmer than present commercial varieties grown in the East, with a much tougher skin than Howard 17, and will stand long distance shipment.

The Fairfax has a rich flavor and is very sweet when normally grown. However, in seasons of much rainfall in the East its flavor may be less rich. At Corvallis, Ore., it retained its flavor better than any other sort in cool wet weather.

TECHNICAL DESCRIPTION OF FRUIT

Form: Uniform blunt conic; size, large, except toward end of season; pubescence on pedicels abundant and outspreading. Calyx lightly reflexed in mature berries, large; berry including apex ripens uniformly; color bright red; seeds yellow or greenish, even with surface; flesh red to dark red, without cavity, juicy; texture very firm; shipping quality very good; flavor mild subacid, aromatic; dessert quality very high. Season about the same as Howard 17 in Maryland and New Jersey and slightly earlier than the Marshall in Oregon.

Dust with *Pomo-Green*

The Leaf-Green Dust.
An Easy, Effective Way to
PROTECT YOUR ROSES

and other Flowering Plants against Insects and Fungus Diseases Without Making the Treatment Conspicuous.

A single material used as a dust or spray to control both insects and diseases on flowering plants and shrubs without being conspicuous on the foliage. Highest rating given in tests conducted by the American Rose Society.

ROSES—Black Spot, Mildew or Chewing Insects are bound to appear. Pomo-Green prevents and controls these insects and diseases quickly and effectively.

FLOWERING PLANTS—Pomo-Green is a specific for the control of Snapdragon Rust, Carnation Rust, Sweet Pea Mildew, Phlox Mildew, Lilac Mildew and many other fungus diseases of flowering plants and shrubs.

Protect new growth by dusting with Pomo-Green once each week throughout the growing season.

Packed in 1-pound and 5-pound metal containers. Price 1-pound can, 75c; 5-pound can \$3.00.

With an order for nursery stock this material will be sent prepaid. Due to it being a poison it cannot be sent by parcel post.

HARDY PERENNIALS

We pay transportation charges on all Perennial orders received within a radius of 500 miles of Selbyville.

The old-fashioned flower back in style. You will find nothing as delightful as a Perennial Garden. By careful selection you may have flowers for your table from early spring until the first frost, in fact later if you will but give the plants a little protection.

While we list some of the leading varieties in their respective class, we have others equally as good, therefore, if you are interested in planting a flower garden and do not find the varieties you want write us as we probably will be able to supply your every requirement.

ASTILBE. 25c each; \$2.25 per dozen.

America. A beautiful variety, color lilac.

Gladstone. Fine white flowers in large pyramidal heads.

Peach Blossom. This variety is thrifty and very compact. A beautiful pink, the color of peach blossoms. A good forcing variety for Easter sales.

Queen Alexander. Deep pink flowers.

CHRYSANTHEMUM. 20c each; \$2.00 per dozen.

Hardy Fall-flowering Autumn Glow. Flowers rosy red, large and freely produced.

Golden Queen. Delightful flowers of bright golden-yellow.

Boston Bronze. Bronze yellow flowers, borne in great profusion.

Old Homestead. Large pink. One of the best.

Victoria. Large white double flowers in great profusion.

DICENTRA SPECTABILIS

Bleeding Heart. Showy, bold plants, admired for their charming rosy-pink flowers in drooping racemes. One of the REAL OLD-FASHIONED FLOWERS. 40c each; \$4.00 per dozen.

DELPHINUM. 20c each; \$2.00 per dozen.

Belladonna. The old-fashioned Larkspur, slender stems with loose spikes of heavenly blue flowers of beauty. A flower that should be in every garden.

Bellamosum. A dark blue form of the preceding variety.

Blackmore and Langdon Strains. A new introduction, worthy of merit, large spikes of single and double flowers in various shades of blue and violets. The combination of this flower with Lilies make a wonderful combination.

DIGITALIS. 20c each; \$2.00 per dozen.

Foxglove. Large bell-shaped blooms on tall spikes. Includes many colors.

GAILLARDI. 20c each; \$2.00 per dozen.

Golden Glow. Considered one of the best of the many varieties of perennials, beginning in June it blooms all summer and is one mass of color. Base of petals is scarlet crimson, bordered golden yellow.

GERMAN IRIS. 15c each; \$1.50 per dozen.

King. Standards golden yellow; falls mahogany.

Jeanne d' Arc. Standards white; falls white bordered with pale lilac.

Lohengrin. One of the best of the German Iris. A vigorous grower. Standards and falls, deep violet mauve.

JAPANESE IRIS. 15c each; \$1.50 per dozen.

Gold bound. Large, pure white, yellow center, six petals.

Gekka-no-nami. Earliest to bloom, the choicest white, free bloomer.

Hercule. Double, clear lilac.

Koki-no-Iro. Large double flowers of purple and gold, early and free blooming. One of the best sorts.

Prosperine. Single, bright rich blue produced by sanding of velvety blue.

HARDY PHLOX. 20c each; \$2.00 per dozen.

Antoin Mercie. Clear lilac with white eye, extra large flowers.

Beacon. A magnificent flower of a brilliant cherry-red shade. Large flowers on fine strong stems above the rich green foliage.

Jules Sandeau. Blooms early. Color is pure bright pink. Semi-tall.

Milly Van Hoboken. A good variety with bright orchid pink blooms of exceptionally large size. The carmine eye adds greatly to the beautiful appearance.

Miss Lingard. Pearly white flower, with delicate pink eye, a remarkable bloomer, indispensable as a cut flower.

Buntings' Nurseries, Inc., Selbyville, Del.

STOKESIA (Cornflower Aster). A charming and beautiful plant, very hardy, and admired by all who see it. The plant grows from 18 to 24 inches high, bearing freely from early June until late October, its handsome lavender-blue blossoms measuring from 4 to 5 inches across. It is easy of culture, succeeding in any open, sunny position. 20c each; \$2.00 per dozen.

STATICE LATIFOLIA (Great Sea Lavender). A valuable plant either for the border or rockery, with tufts of leathery leaves and immense Candelabra-like heads, frequently 1½ feet high and 2 feet across of purplish blue. These, if cut and dried, last in perfect condition for months. 20c each; \$2.00 per dozen.

TRITOMA PFITZERI (Red Hot Poker). Rich scarlet blooms borne on stems 3 feet high, very attractive for mass plantings or planting singly in the border. In bloom from August to October. 25c each; \$2.25 per dozen.

VALERIANA (Garden Heliotrope). The old-fashioned flower, well known by all who have a flower garden. Shows heads of beautiful flowers. We can supply you with White and Old Rose. 20c each; \$2.00 per dozen.

VIOLA (Violets). This is the best edging plant for the hardy border or garden, when properly cared for, these plants remain in full bloom from May until October. 20c each; \$2.00 per dozen.

Admiration. A beautiful dark blue variety.

Prince of Wales. Beautiful rich purple.

Jersey Gem. One of the newer varieties, possessing the dwarf habit and continuity of bloom. An excellent variety of pure, rich violet color, slightly perfumed.

YUCCA FILAMENTOSA (Adam's Needle). A flowering grass that might be classed as an evergreen, as it is always green. Flowers white in July. Grows upright to a height of about 2 to 3 feet. 40c each; \$3.00 per 10.

PERENNIALS SUITABLE FOR ROCK GARDENS

Price 20c each; \$2.00 per dozen.

The following list of Perennials we are especially recommending for Rock Gardens. These are well suited for the purpose.

AJUGA REPTANS (Bugle Flower). Deep purple flowers; prostrate in growth.

ASTER ALPINUS SUPERBUS. Large purple flowers in May and June. Use for borders and rock gardens.

CAMPANULA CARPATICA (Bell Flower). Blooms throughout summer. Flowers deep blue on strong stems.

IBERIS SEMPERVIRENS. Evergreen foliage. Completely covered with clusters of pure white flowers in spring. Valuable for rock gardens and borders. Grows low.

IRIS PUMILA HYBRIDS. Dwarf in growth. Blue and yellow.

PHLOX SUBLATA (Moss or Mountain Pink). Dwarf habit. Alba, pure white; Lilacena, lavender; Rosea, rosy pink.

PAPAVR NUDICAULE (Iceland Poppy). Pure white, yellow, or orange-scarlet flowers. Free bloomer.

SANTOLINA INCANA (Lavender Cotton). Evergreen, very hardy.

STATICE LATIFOLIA (Sea Lavender). Immense panicles of delicate blue flowers.

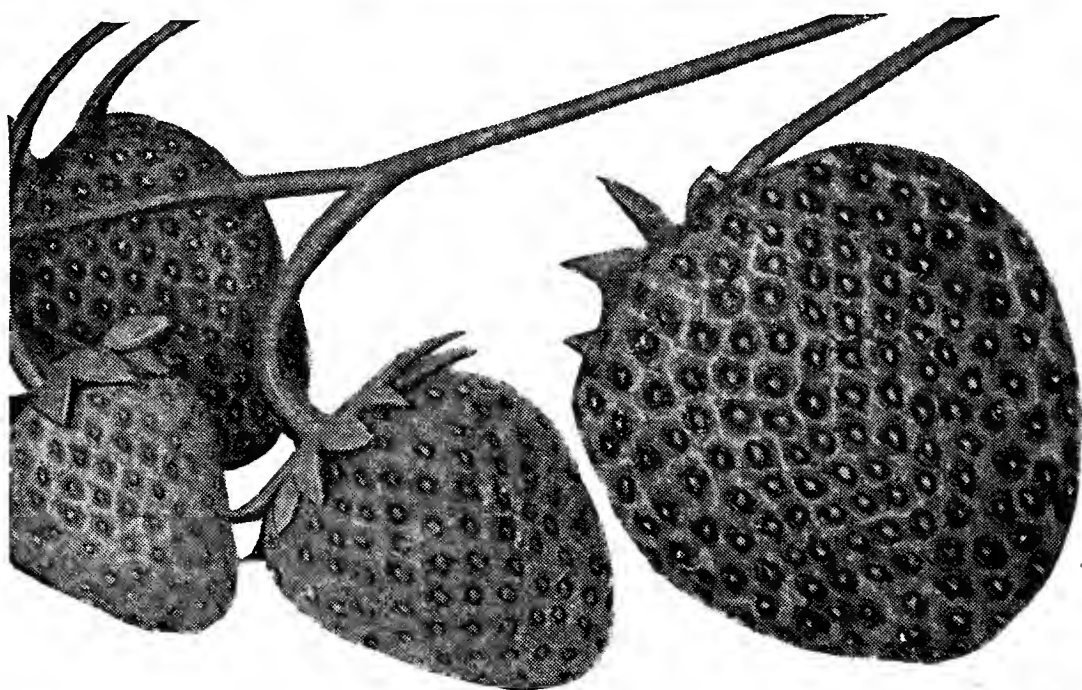

VERONICA AMETHYSTINA. Amethyst-blue flowers; short spikes.

DELPHINUM SINENSIS. A semi-dwarf variety, with intense blue flowers in open panicles.

CERASTIUM BIBERSTEINII (Snow of Summer). White flowers. A low, densely growing plant, with small silvery leaves which appear as covered with frost.

The value of a plan can hardly be estimated. Be the job large or small, planning ahead will eliminate discouraging and costly mistakes.

If you do not find the variety you want listed here, ask us about it. We have many varieties not listed here.
